

Topic 4.2 Privacy and Confidentiality

Main Ideas

Privacy and confidentiality is about keeping research participants' information (data) safe so other people don't have research participants' information.

- Keeping people's **information private** and **confidential** is important in research.
- Researchers keep people's **information private** and **confidential before, during,** and **after** people are in a **research** study.

- You cannot **share information** you learn about research participants **with anyone who isn't on the research team.**

- We usually **do research in private places** to make sure information stays private and confidential.
