

Topic 2.2.1: Rules for Scientific Research with People

Main Ideas

- **Institutional Review Boards (IRB)** are groups of people who **make sure** researchers **protect people's rights and well-being**.

- The **Belmont principles** are the **values** that help us think about **how to treat people** when they are in research. They are:

- **Respect for persons** is about **believing** that **everyone can make decisions** with or without support. Respect for persons also means **taking extra care of people** who have a hard time making decisions.

- **Justice** is making sure **all types of people can be in research** and that everyone shares the good and bad things that can happen in research.

- **Beneficence** is about making research have **as many good outcomes** as possible and **keeping people as safe** as possible.
